

COMMISSARY CONTROL

"Simplify daily tasks with breakthrough flexibility and zero effort."

PHONE ORDERING BREAKTHROUGH

Lockdown is the industry leader in flexible ordering solutions. Our latest leap in technology delivers the unthinkable - commissary orders received with zero effort from your staff and zero hardware investment!

Our exclusive commissary by phone system eliminates all the time spent handing out order forms, taking them up, aligning sheets, and fixing mistakes. Even better, since the inmates place orders through the existing inmate telephone system, there are no expensive pod kiosks to purchase. While Lockdown supports both of these great ordering methods, phone ordering is a breakthrough which offers our partners tremendous opportunities for efficiency.

- Effortless for Officers
- Eliminates Inmate Balance Questions
- Reads Inmate Deposit and Billing History
- Removes Ordering Confusion

OMR BUBBLE SCANNING & KIOSKS

Of course, Lockdown supports industry standard bubble sheet scanning. Using reliable Pearson NCS nSight scanners, you can achieve high accuracy with little effort. In fact, Lockdown is the most tightly integrated software package available on the market. Instead of forcing your staff to use two separate programs and confusing import procedures like most commissary programs, Lockdown ties everything together in one package using a single button.

Lockdown also supports kiosk ordering, barcode scanning, PDA ordering and even hand keying. From our touch screen kiosk ordering to window operations, we will coordinate with your staff to determine the best mix of hardware to achieve success in your facility.

FLEXIBLE RESTRICTIONS

Lockdown combines these ordering options with the industry's most flexible restriction package. For ultimate control, Lockdown provides an unlimited number of restrictions that can identify restricted inmates based on medical condition, privilege level, age, sex, housing location, or other criteria. Once flagged, the inmate can be limited based on the number of items, sale amount, product group, or recent order history. No matter how commissary is ordered, you are in control.

Lockdown Works! Our clients tell us so.

"I would recommend Lockdown to anyone looking for a very workable inmate banking system."

J. Loyd, Lieutenant, ID

The screenshot shows the 'LOCKDOWN Resident Banking - Lockdown Site' application window. The main area displays a 'Current Order' table with columns for Code, Qty, Product, Price, and SubTotal. The table lists four items: Adril Tab 2pk, After Shave Clear 3oz, Comet Blue Deod. Soap 6oz, and Dandruff Shampoo 14.5oz. Below the table are 'Save', 'Help', and 'Close' buttons. On the left, there's a summary of the order: 4 Lines, 5 Items, Subtotal: \$13.32, Taxes: \$1.08, Total: \$14.40. At the bottom, it shows the user 'Smith, John A' with a balance of \$32.00 and a status of 'OPEN'. The date is 5/10/1969.

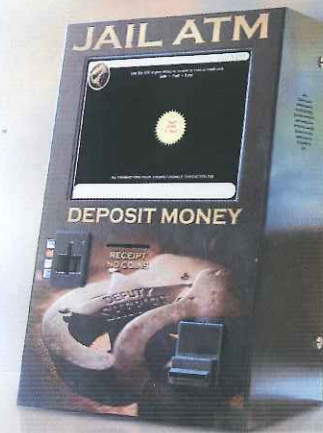

Code	Qty	Product	Price	SubTotal
30010	2	Adril Tab 2pk	\$1.11	\$2.22
30020	1	After Shave Clear 3oz	\$4.44	\$4.44
30110	1	Comet Blue Deod. Soap 6oz	\$2.22	\$2.22
30150	1	Dandruff Shampoo 14.5oz	\$4.44	\$4.44

Subtotal: \$13.32
Taxes: \$1.08
Total: \$14.40

CASHIER KIOSKS

*"We took the hassle out,
and put the easy in..."*

SAVE TIME!

A single JailATM cashier kiosk in the lobby of your jail can virtually eliminate the time consuming task of receiving inmate deposits. The JailATM system allows family members to quickly and easily make cash or credit card deposits into an inmate's trust fund account - without wasting your officers' time.

The JailATM is as easy to use as a vending machine yet can save hundreds of officer hours per year!

TOTAL INTEGRATION

The JailATM system is completely integrated with the Lockdown Resident Banking System. This means that inmate deposits put into the JailATM will automatically be deposited into inmate accounts. Your staff will only need to count the cash, verify the total, and take it to the bank!

As an added benefit, the system's integrated tracking removes opportunities for employee theft, keeping the cash more secure.

RECOUP COSTS

The JailATM system can not only eliminate costs, it can also add cash to your budget! The JailATM system can automatically charge a fee when deposits are made. This fee can easily pay for the JailATM system and maintenance.

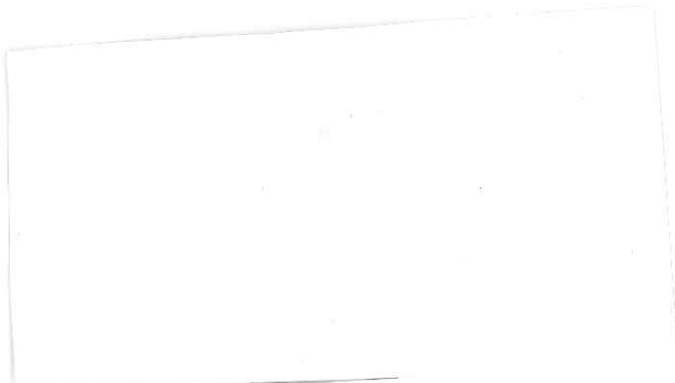

SPECIFICATIONS

- Large 17 inch touchscreen
- Dell Small Form Factor PC
- Rugged 16 gauge welded steel enclosure
- Secure tubular locks
- Reliable MEI bill acceptors
- Dependable thermal printer
- MAGTEK credit card reader
- Wall-mounted / rear bolting
- No external cables or screws

Lockdown Works! Our clients tell us so.

"Lockdown is a great program. Very straight forward and easy to use. Also, the support at Tech Friends is excellent. They are able to answer any questions or concerns that I may have with a prompt response."

K. Allen, Commissary Manager, GA

INMATE ACCOUNTING

"The right use of technology unleashes the power to be in control."

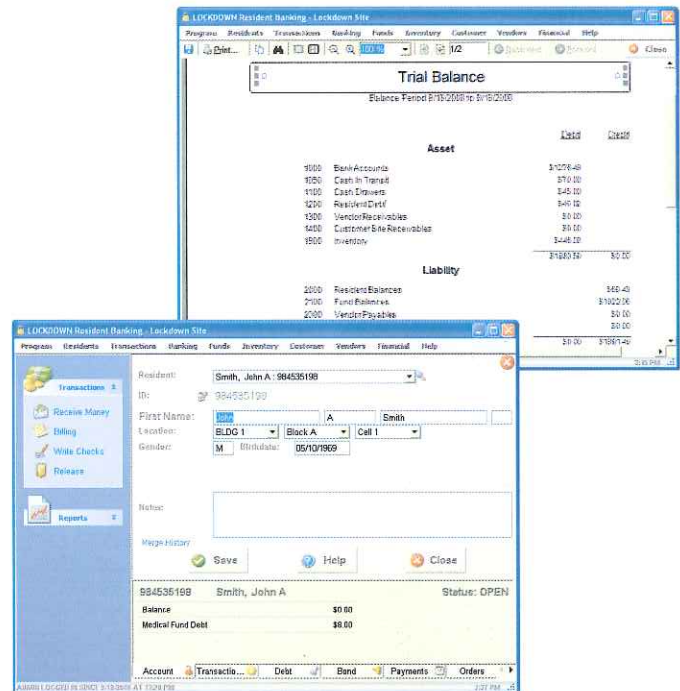

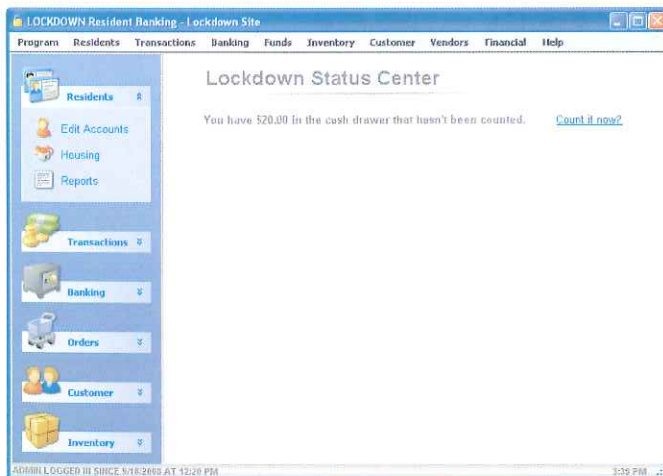

DO THESE SOUND FAMILIAR?

- Staffing a money receipt window without kiosks...
- Hard to use inmate accounting...
- Loss of inmate histories when your commissary provider changes...
- Headaches fixing accounting mistakes...
- Frustrated auditors who can't find what they need...
- Outdated software...
- Painful Technical Support...

It's time to take charge.

The Lockdown Resident Banking System solves these problems at no cost to your facility.

The Lockdown Resident Banking System was developed with one single goal in mind - *to provide correctional facilities with the most effective software for managing trust fund and commissary operations.*

WHAT MAKES LOCKDOWN UNIQUE?

Quite simply, Lockdown was designed to remove stress from inmate accounting and commissary operations. All too often with jail management systems, inmate accounting is just a minor add-on to sell an expensive software package.

Commissary providers sometimes dabble in technology but can we really expect a snack delivery service to develop world-class accounting software? No, it takes a software development team focused exclusively on your commissary and accounting needs to do just that. That's how we've been so successful creating a new breed of trust accounting that has been proven to save time, reduce staff requirements, and eliminate problems in correctional facilities just like yours.

LOCKDOWN SAVINGS

THE BOTTOM LINE

What can you really expect Lockdown to do for your financial bottom line? Promises are everywhere and very few software packages deliver.

Every installation gives unique opportunities to streamline and improve processes that result in overall cost savings for the facility. One recent installation in Knoxville, TN yielded tremendous savings for the institution. Working with this 1200 bed facility, cashier kiosks were installed along with an advanced ordering system. These were integrated with Lockdown's core inmate accounting and inventory features.

We estimated their savings in the chart to the right. As it shows, Lockdown offers real reductions in staff time that translate into bottom line budget savings.

Don't take our word for it--we encourage you to talk to our existing correctional partners and learn first-hand what an impact it can have on your operations. In fact, we'll help arrange an onsite meeting at the Knoxville facility--they'd love to show off their new system!

Time Savings	
	Hours/Week
Entering Money Receipts	10 hours
Order Entry	25 hours
Billing/Receivables	3 hours
Work Release Processing	2 hours
Indigent Processing	2 hours
General Accounting	3 hours
Total Weekly Savings:	45 hours

**Achieving this level of savings
at 19 ADOC facilities could net
yearly savings exceeding:
\$ 1.1 Million**
